San Jose, Rodriguez, Rizal

PROFESSIONAL SUMMARY

Impact-driven Full-Stack Web Developer specializing in the React.js and Laravel ecosystem, with a proven track record of architecting scalable web applications and secure RESTful APIs. Directed the end-to-end development of institutional platforms serving over 1,500 users, successfully digitizing manual workflows and reducing processing times by 100%. Adept at managing local network infrastructures, establishing strict data security protocols, and delivering high-availability user interfaces that drive immense operational efficiency.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, Vite, Bootstrap 5, Tailwind CSS.
- **Backend & APIs:** PHP, Laravel (v12), Java, Spring Boot, RESTful API Development.
- **Database Management:** MySQL, Relational Database Design, SQL Query Optimization.
- **Infrastructure & Deployment:** Hostinger, Vercel, Git, GitHub, Local Networking (Routers, Switch Hubs).
- **Tools & IT Support:** Postman, Hardware Troubleshooting, OS Installations, File & Printer Sharing.

WORK EXPERIENCE

Holy Face of Jesus Lyceum of San Jose Inc. January 2025 - Present

Web Developer & IT Specialist

- Architected and deployed end-to-end institutional management systems (CampusLoop and SmartEnroll), successfully managing zero-downtime database migrations and actively supporting over 1,500 concurrent users.
- Digitized the entire institutional registration workflow, completely eliminating manual enrollment processes (100% reduction in manual processing time).
- Engineered a secure computer laboratory network infrastructure connecting 30 workstations, integrating Wi-Fi 6 routers, switch hubs, and OpenDNS filtering to ensure uninterrupted academic workflows.
- Centralized file and network printer sharing protocols for the computer laboratory and marketing department, eliminating manual document transfers and accelerating staff collaboration.
- Streamlined institutional IT operations by delivering rapid technical support, efficiently resolving weekly hardware and software tickets to minimize system downtime.

Municipality of Montalban, Rizal 2023

IT Support Intern (SPES)

- Delivered Level 1 technical troubleshooting within a high-volume government office, rapidly resolving issues related to network connectivity, printer setups, and software errors.
- Accelerated issue resolution times to ensure uninterrupted public service operations while consistently upholding high standards of professional work ethic.

KEY PROJECTS

CampusLoop (Learning Management System) Technologies Used: React.js, Vite, Laravel 12, MySQL

- Developed a dynamic, interactive LMS featuring a highly responsive frontend crafted with React, Vite, and Bootstrap 5.
- Engineered a secure core processing engine using Laravel 12, integrating WebSocket technology to deliver real-time, low-latency notifications across the platform.
- Implemented strict role-based access control (RBAC) and structured the MySQL database utilizing UUIDs for enhanced security.

SmartEnroll (Enrollment Management System) Technologies Used: Laravel, React.js, Hostinger

- Engineered a secure enrollment portal to centralize academic records and fully automate student onboarding processes.
- Optimized system performance to reduce Certificate of Registration (COR) generation time from 30-45 minutes per student down to mere seconds.
- Executed live deployment and ongoing maintenance via Hostinger, ensuring strict data integrity and high availability during peak enrollment periods.

TaskFlow (Project Management App) Technologies Used: React, Laravel 12

- Built a modern, API-first Kanban-style application utilizing a reactive user interface developed with React.
- Constructed a robust backend leveraging Laravel 12, incorporating secure authentication protocols and seamless workflow tracking functionalities.

Food Ordering REST API Technologies Used: Java, Spring Boot

- Developed a secure backend service for an online food ordering platform utilizing Java Spring Boot.
- Demonstrated advanced competency in object-oriented programming principles, JSON Web Token (JWT) authentication, and Java ecosystem architecture.

Developer Portfolio Technologies Used: React, Tailwind CSS, Vercel, Laravel

- Designed, built, and deployed a custom terminal-themed personal portfolio utilizing React and Tailwind CSS for a modern, responsive user experience.
- Hosted the optimized frontend on Vercel while seamlessly integrating a custom Laravel backend to manage secure data handling.

EDUCATION

Colegio de Montalban Graduated: 2025

Bachelor of Science in Information Technology

CERTIFICATIONS & SEMINARS

Technical Education and Skills Development Authority (TESDA) May 2026

Programming (Java) NC III
